Update

- Approved today
- To be published [here](#)
- Comments closed 4 November 2020
- Final Report 16 December 2020
- Minimal changes

2.1 Address ICFs – IEC Decision

Dino Ou, Endeavour

2.2 Name Title ICF Update

Joe Castellano, Origin

Feedback from AEMO IT:

- At the moment, the NameTitle element in aseXML schema can take an empty or zero length string. It is not an enumerated list in the schema – participants can put anything in there with the only limitation being it is no longer than 12 characters.
- IT recommend against using NULL as a text to indicate NULL or no value as this may be confusing. Empty strings (<NameTitle> </NameTitle> or <NameTitle/>) are both currently allowed and don't require a schema change. This would merely require clarification and guidance in the procedures and guides on what is the appropriate handling.
- The NameTitle declaration does not have it set to nillable so a 'NULL' would not be allowed currently. This change would require a schema change/

Next steps

- ICF redrafted
- Tech Specs, possibly Guide to be updated to clarify this
